

## op5 Statistics 2.10 rebuild for System 3.0

### Release Notes

#### About this Release

**Product:** op5 Statistics

**Release Number:** 2.10.4 rebuild for System 3.0

**Release Date:** October 2007

**Release Type:** Feature update

**Previous Release:** 2.10

**Available Media:** Downloadable as tar.gz or iso format from <https://support.op5.se/>

#### Introduction

This document contains release notes for op5 Statistics 2.10. The document is intended to give brief information about the new release. It is directed towards staff responsible for managing op5 products.

#### What's New

##### ***Rebuild to support op5 System 3.0***

This release does not include any new functionality other than mentioned below, it is a plain rebuild to support the new op5 System 3.0 platform. Statistics is also now available as a separate download which you can install on your own hardware and OS. For information about supported hardware and software see <https://support.op5.com/>

##### ***Inclusion of new templates***

While we are "at it" we throw along a couple of new templates for data collection and graphing of the environmental modules EM1 and E4, we also include a template for Cisco Aironet products.

#### Installation and Upgrade Notes

The "op5 Statistics 2.10 rebuild for op5 System 3.0" can be installed on all existing op5 platforms; Entry, Standard and Large. op5 Statistics 2.8 or 2.10 is required for upgrading.

#### Documentation

For upgrading and installing version 2.10 of op5 Statistics please see the manual on <https://support.op5.com/>
